

Armac Martin Handles

Information, Aftercare & Cleaning

Information

All Armac Martin handles are made from solid brass and are available in a selection of plated and patinated finishes, many of which are hand finished.

Aftercare & Cleaning

Lacquered finishes (PBL, SBL, SBSL, ABL, SAS, AMB, CBP, MBL & MWL)

It is recommended to clean occasionally with only a soft cloth. For heavy staining, a damp cloth can be used, followed by a dry cloth. Abrasive cleaning products should never be used as they will break down the lacquer much quicker.

Plated finishes (un-lacquered – PNP, PCP, SNP, SCP, NBP & HBN)

It is recommended to clean occasionally with a soft cloth with a good quality, non-abrasive metal polish which will help to preserve the finish.

Non-plated finishes (un-lacquered – PBUL, SBUL, ABUL, HBB & BEL)

It is recommended to clean occasionally with a soft cloth. Un-lacquered finishes will naturally oxidise over time.

PLEASE NOTE: the use of abrasive or chemical cleaners on any of these finishes will have an adverse effect on the finish. Any unusual discoloration will be attributed to the use of a non-approved cleaning product, for which Herbert Direct and the manufacturer will accept no liability.
